DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 12, 14-16, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1061495.

The EP'495 documents discloses a driver assistance system 20 which outputs a brake request signal to a brake control unit 8. The driver assistance system outputs a brake request signal in the form of a distance L^* which specifies the distance to be traveled by the vehicle within which the vehicle is to reach a predefined target velocity V^* . The brake control unit 8 includes a conversion unit for converting the distance signal $S7$ into a brake operation signal $Pb(n)$. In claim 1 of the EP document a target velocity predefined by the driver assistance device is disclosed. The setpoint deceleration rate is calculated and a wheel brake pressure is controlled as a function of the calculated setpoint deceleration rate.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP'495 in view of DE '048.

The EP '495 documents lacks a driver assistance device that uses a braking to standstill (target velocity equal to zero). The DE '048 documents discloses braking to standstill target velocity equal to zero and would have been obvious to one having ordinary skill in the art in order to stop the vehicle safely.

Claims 17 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
